SAYYED SAIRIN

Web Developer & Automation Engineer

Mumbai, India • Email: sayyedsairin@gmail.com • LinkedIn: linkedin.com/in/sairin-sayyed •

Portfolio: sairinsayyed.github.io

PROFESSIONAL SUMMARY

Versatile Web Developer and Automation Specialist with expertise in full-stack web solutions, API integrations, Python automation, and cloud services (GCP). Skilled at combining modern web frameworks with AI workflows (Dialogflow, Vertex AI) and SaaS ecosystem automation (Google Workspace, Zoho). Proven track record of managing end-to-end web deployments, LMS platforms, and enterprise support workflows.

TECHNICAL SKILLS

Web & CMS:	HTML5, CSS3, JavaScript (ES6+), PHP, WordPress, Shopify, Moodle LMS, Responsive UI
Automation & APIs:	Python, REST APIs, Google Apps Script, Google Reseller API, Service Accounts, Automation Workflows
AI & Cloud Services:	Google Cloud Platform (GCP), Dialogflow, Vertex AI, Claude AI, Conversational AI Bots
DevOps & Business Tools:	Git, GitHub, cPanel, FTP, Server Migrations, Zoho Suite (CRM, Books, Projects), React.js (Basics)

PROFESSIONAL EXPERIENCE

Executive Web Developer — **Think Technology Services** **Jan 2025 – Present**

Mumbai, India

- Develop, deploy, and maintain custom web applications and responsive landing pages utilizing HTML5, CSS3, JavaScript, PHP, WordPress, and Shopify.
- Architect Python automation scripts leveraging Google Reseller API and GCP Service Accounts to automate domain provisioning and Google Workspace administration.
- Implement conversational support workflows by integrating Dialogflow and Vertex AI with Python backends to streamline administrative ticket handling.
- Manage web infrastructure including cPanel operations, FTP deployments, DNS management, and complex site migrations with zero downtime.

Web Developer — **Limra Online School** **Feb 2024 – Dec 2024**

Remote

- Engineered and maintained the core institution website and WordPress-based Learning Management System (LMS).
- Customized PHP templates, plugins, and custom CSS to optimize digital learning environments and improve user navigation.

Web Developer Intern — **AFHI Universal** **Feb 2023 – Jan 2024**

Remote

- Maintained Moodle e-learning platform frontend using JavaScript, HTML, and CSS, enhancing user interface responsiveness.
- Assisted senior developers with server hosting transfers, file migrations via FTP, and media content integration.

KEY PROJECTS & IMPLEMENTATIONS

AI Assistant Bot for Technical Support | **Dialogflow, Vertex AI, Claude AI, GCP, Python** **2025**

- Engineered an AI-powered automated support assistant on GCP that uses Dialogflow and Vertex AI to resolve frequent customer service queries, reducing response times for technical teams.

Domain & Google Workspace Reseller Automation | **Python, Google Reseller API, Service Accounts** **2025**

- Developed a Python automation framework connecting to Google Reseller APIs and Service Accounts to automate Google Workspace account provisioning and domain configuration.
